## CONTENTS - Volume 20, No. 1

**Combining a robust PCA of logratio transformed data and geostatistical sequential Gaussian simulation approach for geochemical characterization of orogenic gold deposits: a case study from the Alut area, NW of Iran**
Fereydoun Sharifi, Ali Reza Arab-Amiri, Abolghasem Kamkar-Rouhani & Masood Alipour-Aasl

**The Hadamengou K-feldspar–quartz vein-type Au mineralization in the northern margin of the North China Craton (China): an Indosinian oxidized intrusion-related Au–(Mo) system?**
Sanshi Jia, Jianfei Fu, Ende Wang & Yekai Men

**Using regolith and spinifex chemistry to detect fault-controlled fluids in the Ngururupa area of northeastern Australia, with implications for Pb–Zn mineralization**
Paul Morris

**Provenance, tectonic setting and mineralization significance in the Linxi Formation, eastern Inner Mongolia, NE China**
Xi Wang, Yun-Sheng Ren, Jun-Wei Bo & Dong-Sheng Zhao

**Listwaenitization and enrichment of precious metals in the hydrothermal mineralization zones of serpentinites in Sugeçer-Van (Eastern Anatolia, Turkey)**
Tijen Üner

**Assessing copper fertility of intrusive rocks using field portable X-ray fluorescence (pXRF) data**
Ayesha Ahmed, Anthony J. Crawford, Christopher Leslie, Joshua Phillips, Tristan Wells, Amos Garay, Shawn B. Hood & David R. Cooke

**The application of pXRF for the chemical and mineralogical characterization of heavy mineral sands**
D. Gallhofer & B. G. Lottermoser

**Refining fine fraction soil extraction methods and analysis for mineral exploration**

**Application of ultrafine fraction soil extraction and analysis for mineral exploration**
