The Geological Society

The Geological Society of London was founded in 1807. It is the UK national society for geoscience, and the longest-established geological society in the world. It was incorporated under Royal Charter in 1825 and is Registered Charity 210161.

As a learned society and professional body, the Geological Society provides a wide range of professional and scientific support to over 12,000 Fellows (FGS), about 2000 of whom live overseas. Fellowship of the Society is open to those holding a recognised honours degree in geology or a cognate subject, or not less than six years relevant experience in geology or a cognate subject. The Society is the chartering authority able to award Chartered Geologist (CGeol) status to appropriately qualified Fellows with six years relevant postgraduate experience in the practice of geology. The Society also awards the title of Chartered Scientist (CSI). Candidate Fellowship is available to those who do not yet qualify for Fellowship (e.g. students).

The Society has its own Publishing House in Bath, UK. It publishes the Society’s international journals, special publications, books and maps and is the European distributor for publications of the American Association of Petroleum Geologists (AAPG) and the Society for Sedimentary Geology (SEPM). Fellows are entitled to significant discounts on journals, books and special publications. The Society has an online bookshop (http://www.geolsoc.org.uk/bookshop) where books can be purchased online using credit and debit cards.

Further information about the Society and Membership may be obtained from the Geological Society, Burlington House, Piccadilly, London W1J 0BG (email: enquiries@geolsoc.org.uk; tel: +44(0)207 434 9944).

More information on the society can be found at http://www.geolsoc.org.uk

The Lyell Collection

One of the largest integrated collections of online Earth science literature in the world

What is the Lyell Collection?

The Lyell Collection is an online collection comprising the Society’s journal titles, Special Publications and key book series. Cutting edge science sits alongside important historical material, benefiting from the superb functionality offered by the online host, HighWire.

With over 310,000 peer-reviewed pages, 30,000 articles and 1,000 volumes, the Lyell Collection is an invaluable tool for the researcher and student alike.

- Full text in HTML and PDF format
- Actively linked to cited references
- Free abstracts
- Free eTOC alerting
- Selected articles free online
- The Lyell Collection welcomes Open Access papers

Special Publication Online Archives

The first 450 volumes of the Geological Society’s Special Publications Online Archive are available as one-off purchase with perpetual access. Volumes 401-450 now available.

Journals of the Geological Society Online Archive

The JGS Archive includes over 17,000 articles and comprises over 150 years of geoscience research, including historically important content from many eminent scientists.

The Geological Society

The Geological Society of London was founded in 1807 and is the UK national society for geoscience. It is a global leader in Earth science publishing, dedicated to providing high-quality content and service throughout the world.

Submission procedure: Manuscripts should be prepared as outlined here: https://www.geolsoc.org.uk/geea_authorinfo

All submissions to the journal should be made online via www.editorialmanager.com/geochem

Association of Applied Geochemists

The Association of Applied Geochemists is an international organization specializing in the field of exploration and applied geochemistry. Their objectives are to promote the application of geochemistry in relation to exploration and the environment, to foster communication, fellowship and cooperation between those working in, studying or who have an interest in these fields. The AAG newsletter is EXPLORE (quarterly). AAG offers three types of membership; Fellow (voting members); Member (non-voting members); and Student. At three receive the journal Geochemistry: Exploration, Environment, Analysis and the EXPLORE newsletter as part of their membership. Prospective members can obtain membership application forms from the Web Site (http://www.appliedgeochemists.org) or from Al Arsenault at the AAG Business Office, PO Box 26099, 72 Robertson Rd, Nepean, ON, Canada K2H 9R0. Tel: 613-828-0199; Fax: 613-828-9288; E-mail: office@appliedgeochemists.org. Annual dues are $110.00. Student members pay annual dues of $10.00. The Business Office should be notified of any change of address.

Cameron-Hall Copper Medal

The Association of Applied Geochemists (AAG) awards the Cameron-Hall Copper Medal to the lead author for outstanding scientific publication in Geochemistry: Exploration, Environment, Analysis (GEEA). This annual medal will be presented to the deserving recipient at the AAG’s International Applied Geochemistry Symposium. The Cameron-Hall Copper Medal is named in honour of two prominent and highly published AAG members and past editors of GEEA, Eric Cameron and Gwenda Hall. Both are the only AAG Gold and Silver Medal awardwiners since the association formed nearly 50 years ago. More information is available on the AAG website https://www.appliedgeochemists.org/association/awards

Typeped by Nova Tchosel Private Limited, Bengaluru and Chennai, India. Printed in Great Britain by Henry Ling Limited, at the Dorset Press, Dorchester, Dorset, DT1 1HD
