

## The Geological Society

The Geological Society of London was founded in 1807 and is the oldest geological society in the world. It received its Royal Charter in 1825 for the purpose of 'investigating the mineral structure of the Earth' and is now Britain's national society for geology.

Both a learned society and a professional body, the Geological Society is recognized by the Department of Trade and Industry (DTI) as the chartering authority for geoscience, able to award Chartered Geologist status upon appropriately qualified Fellows. The Society has a fellowship of 9099, of whom about 1500 live outside the UK.

Fellowship of the Society is open to persons holding a recognized honours degree in geology or a cognate subject, or not less than six years' relevant experience in geology or a cognate subject. A Fellow with a minimum of six years' relevant postgraduate experience in the practice of geology may apply for chartered status. Successful applicants are entitled to use the designatory postnominal CGeol (Chartered Geologist).

Fellows of the Society may use the letters FGS. Candidate Fellowship is available to members not yet qualifying for Fellowship. The Society has its own Publishing House based in Bath, UK. It produces the Society's international journals, books and maps, and is the European distributor for publications of the American Association of Petroleum Geologists (AAPG), the Society for Sedimentary Geology (SEPM) and the Geological Society of America (GSA). Members of the Society can buy books at considerable discounts. The Publishing House has an online bookshop (<http://www.geolsoc.org.uk/bookshop>). Further information on Society membership may be obtained from the Fellowship Department, The Geological Society, Burlington House, Piccadilly, London W1J 0BG (e-mail: [enquiries@geolsoc.org.uk](mailto:enquiries@geolsoc.org.uk); tel: +44 (0)207 434 9944).

The Society's Web Site can be found at <http://www.geolsoc.org.uk/>. The Society is a Registered Charity, number 210161.

## Association of Applied Geochemists

The Association of Applied Geochemists is an international organization specializing in the field of exploration and applied geochemistry. Their objectives are to promote the application of geochemistry in relation to exploration and the environment, to foster communication, fellowship and co-operation between those working in, studying or who have an interest in these fields. The AAG newsletter is EXPLORE (quarterly). AAG offers three types of membership: Fellow (voting members); Member (non-voting members); and Student. All three receive the journal *Geochemistry: Exploration, Environment, Analysis* and the EXPLORE newsletter as part of their membership. Prospective members can obtain membership application forms from the Web Site (<http://www.appliedgeochemists.org>) or from Betty Arseneault at the AAG Business Office, P.O. Box 26099, 72 Robertson Rd, Nepean, ON, Canada K2H 9R0. Tel: 613-828-0199; Fax: 613-828-9288; E-mail: [office@appliedgeochemists.org](mailto:office@appliedgeochemists.org). Annual dues are \$100.00. Student members pay annual dues of \$10.00. The Business Office should be notified of any change of address.

### Submission procedure:

Manuscripts should be prepared as outlined on the Society's Web Site ([www.appliedgeochemists.org](http://www.appliedgeochemists.org)) and sent to Marcia Scrimgeour, Editorial Office Manager, *Geochemistry: Exploration, Environment, Analysis*, P.O. Box 26099, 72 Robertson Road, Nepean, Ontario K2H 9R0, Canada. Tel: 613-828-1222; Fax: 613-828-9288; E-mail: [geea@sympatico.ca](mailto:geea@sympatico.ca).
